A. National holidays

	Coef.	t
New Year's Day	−1.327	−16.3
Epiphany	−2.070	−26.3
Easter Sunday†	−0.394	−6.4
Easter Monday	−2.376	−38.7
Liberation Day	−2.176	−26.4
Labour Day	−1.518	−18.7
Republic Day	−1.908	−23.1
Assumption of Mary	−1.160	−14.2
All Saints' Day	−1.609	−19.4
Immaculate Conception	−1.843	−22.4
Christmas	−3.168	−38.0
St. Stephen's Day	−2.771	−31.3

B. Month end and fixed days, by day type

Coef. (t)	Weekday	Saturday	Sunday
EoM	2.150 (71.0)	3.388 (64.1)	4.229 (85.3)
EoM−1	0.367 (11.9)	1.809 (37.0)	–
EoM−2	0.284 (9.4)	–	
EoM−3	0.282 (9.8)	–	−0.204 (−7.6)*
EoM−4	0.195 (6.9)	–	
EoM−5	0.123 (4.5)	–	
Day 1	0.341 (11.2)	0.648 (13.3)	1.351 (26.5)
Day 15	0.312 (12.9)	0.755 (16.2)	1.269 (26.1)
Day 20	0.148 (6.3)	0.221 (4.9)	0.252 (5.4)
Last working day‡	0.748 (20.6)	–	–

C. Model parameters

	Coef.	t
MA(1)	−0.201	−10.2
Seasonal MA, period 7	0.953	148.9
Seasonal MA, period 365.24	0.837	65.1
Observations: 2,557 (2019–2025)		
Calendar regressors: 32; outliers: 7		

D. Outliers

Type	Date	Coef.	t	Event
AO	03/02/2019	1.189	7.4	First Sunday of February
AO	02/02/2020	1.157	7.3	First Sunday of February
LS	09/03/2020	−0.414	−15.1	Covid-19 lockdown
AO	05/04/2020	1.041	6.6	Covid-19 period
LS	02/06/2020	0.281	10.3	End of lockdown
WO	06/12/2020	0.636	6.2	Covid-19 period
AO	26/12/2020	−1.101	−6.8	St. Stephen's Day on Saturday

Notes: pre-treatment estimates on the log scale; t-statistics in the second column of panel A and in parentheses in panel B; the multiplicative effect is exp(coefficient). All coefficients are significant ($|t| > 4$). EoM: last day of the month; EoM−k: k days before. Holidays enter only when they fall on a working day. Effects in panel B are relative to a normal day of the same type. – not included (not significant). † Relative to a normal Sunday. * Single regressor for Sundays falling 2 to 5 days before the month end. ‡ Friday before a month end falling on a weekend; added to the EoM−1 or EoM−2 weekday effect. Panel C: MA parameters of the fractional airline model (periods 7 and 365.2425).
